

VISIBILITY AUDIT

WebFluence Digital

The Visibility Strategist Squad's first battle-test. Take a one-page Vercel site from invisible to ranking on Page 1 for Dublin web design SME queries.

TARGET SITE

01 — EXECUTIVE SUMMARY

Where you stand. What we'd change.

Two domains in scope. The legacy site (webfluence.digital) is what Google currently sees and ranks — a Vite React app with content rendered client-side. The new site (webfluence-digital.vercel.app) is a single static HTML page — fully crawlable but with no surface area to rank against. The plan: expand the new site to 10 pages, fix 8 technical issues, build entity signals (Wikidata + Crunchbase), ship 12 cluster posts in 90 days, and migrate the legacy domain when the new architecture stabilises.

RECOMMENDED

SEO SNAPSHOT

8 keywords. 1 owner page each. 1 cluster.

Primary commercial cluster: "web design dublin" (KD 32, vol 880) + "web design ireland" (KD 28, vol 590), both owned by a single /services/web-design pillar. Secondary: SEO Pillar (KD 38, vol 1100) on /services/seo. Critical: pricing query (KD 16, vol 480) + AEO triple-win on /pricing. Targets: Top 3 by 2026-08-31 on the primary cluster.

AEO SNAPSHOT

8 questions banked. Audit pending.

Multi-platform citation baseline scheduled for 2026-05-09 review (ChatGPT, Claude, Gemini, Perplexity). Eight pricing/comparison/best-of questions banked with answer drafts. Highest-leverage AEO target: "how much does a website cost in dublin" (PAA + AI Overview opportunity, currently uncited for Dublin-specific pricing). FAQ schema on /pricing + / is the P1 win.

The headline: Both domains underperform their potential. Google indexes the legacy React SPA but the new static site is invisible by design (only one page exists). The single biggest unlock isn't ranking work — it's expanding the new site into 10 pages with proper schema, then migrating. That alone moves the brand from invisible to competitive within 90 days.

02 — AI CITATION SCORECARD

How often AI assistants recommend you.

Audit scheduled for the 2026-05-09 review window. The prompt set (30 prompts × 4 platforms = 120 data points) is built from the Question Bank tab. Baseline citation rates and lost-prompt analysis populate at first measurement. AI citation behaviour is point-in-time and shifts with model updates — every audit is dated.

TOP 8 QUESTIONS TO AUDIT AGAINST

These are the queries the audit will test on each platform. Each has an answer draft ready, a target page, and a Schema Type recommendation. Citation status defaults to "Not cited" pending baseline.

QUESTION	SOURCE	INTENT	SCHEMA	PRIORITY
how much does a website cost in dublin	PAA	Pricing	FAQPage	Critical
best web designer for small business in ireland	AnswerThePublic	Best-of	Article	Critical
what is the difference between web design and web development	PAA	What-is	Article	High
how long does it take to build a website	Reddit	How-to	HowTo	High
do i need seo for a small business website	AnswerThePublic	What-is	Article	High
what is local seo in ireland	PAA	What-is	Service	High

QUESTION	SOURCE	INTENT	SCHEMA	PRIORITY
how to get my business on page 1 of google	GSC	How-to	HowTo	High
best ai automation tools for small business ireland	Reddit	Best-of	Article	Medium

03 — KEYWORD LANDSCAPE

What you should be ranking for.

Eight keywords prioritised by combination of volume, current position, and realistic movement. Two own a single pillar page (/services/web-design). The rest split across SEO, AI Automation, and three industry verticals (small business, dental, fitness). Pricing query is the triple-win target.

KEYWORD	VOL	KD	INTENT	CURRENT	TARGET	PRIORITY	OWNER PAGE
web design dublin	880	32	Commercial	—	3	Critical	/services/web-design
web design ireland	590	28	Commercial	—	5	Critical	/services/web-design
seo dublin	1100	38	Commercial	—	5	High	/services/seo
how much does a website cost ireland	480	16	Informational	—	1	Critical	/pricing
small business website ireland	320	18	Commercial	—	1	High	/industries/small-business
ai automation ireland	210	22	Commercial	—	3	Medium	/services/ai-automation
dental website	110	14	Commercial	—	1		

KEYWORD	VOL	KD	INTENT	CURRENT	TARGET	PRIORITY	OWNER PAGE
design ireland						High	/ industries/ dental
gym website design ireland	90	12	Commercial	—	1	Medium	/ industries/ fitness

04 — TECHNICAL FINDINGS

What's broken under the hood.

Three Critical issues, four High, one Medium. The two architecture issues are the biggest unlocks: (1) the new site needs page expansion, (2) the legacy site is React SPA and needs SSG migration before the cutover. Both shippable in the build squad's normal cadence.

ISSUE	CATEGORY	SEVERITY	SOURCE	AFFECTED
New Vercel site is single-page — no internal linking architecture or page expansion	Internal Linking	Critical	Manual	webfluence-digital.vercel.app/
Missing Organization + LocalBusiness JSON-LD schema on new site	Schema	Critical	Manual	webfluence-digital.vercel.app/
New site title tag too generic for primary commercial query	Indexation	High	Manual	webfluence-digital.vercel.app/
Legacy site is React SPA with potential JS rendering issues	Crawlability	High	Manual	webfluence.digital/
No FAQ schema on pricing/services content on either site	Schema	High	Manual	both domains
No XML sitemap on new Vercel site	Crawlability	High	Manual	webfluence-digital.vercel.app/
Legacy site loads 5+ third-party trackers — likely impacts LCP	Core Web Vitals	Medium	Manual	webfluence.digital/

ISSUE	CATEGORY	SEVERITY	SOURCE	AFFECTED
Brand entity not registered on Wikidata or Crunchbase	Entity	Medium	Manual	external

05 — SITEMAP RECOMMENDATIONS

The pages that should exist.

From 1 page to 10. Each owns a primary keyword and answers a primary AEO question. Schema spec'd per page. The build squad consumes this directly — Visual Storyteller turns it into a storyboard, UX Architect turns it into routes + JSON-LD blocks.

PAGE SLUG	TYPE	PRIMARY KEYWORD	SCHEMA	PRIORITY	STATUS
/	Pillar	web design dublin	Organization + LocalBusiness	Critical	Live
/services/web-design	Service	web design dublin	Service + FAQPage	Critical	Proposed
/services/seo	Service	seo dublin	Service + FAQPage	Critical	Proposed
/services/ai-automation	Service	ai automation ireland	Service + FAQPage	Medium	Proposed
/industries/dental	Industry	dental website design ireland	Service + Article	High	Proposed
/industries/fitness	Industry	gym website design ireland	Service + FAQPage	Medium	Proposed
/industries/small-business	Industry	small business website ireland	Service + FAQPage	High	Proposed
/pricing	Resource	how much does a	FAQPage + Product	Critical	Proposed

PAGE SLUG	TYPE	PRIMARY KEYWORD	SCHEMA	PRIORITY	STATUS
/resources/ page-1- google-guide	Pillar	website cost ireland	Article + HowTo + FAQPage	High	Proposed
		how to get on page 1 of google			
/case- studies/ adare-clinic	Resource	adare clinic website case study	Article (CaseStudy)	Medium	Proposed

06 — FIX PACK

Do these in this order.

P1 in 7 days. P2 in 30. P3 within 90. Each has expected impact — quoted, not guessed. The first three P1 fixes unlock everything downstream.

P1

Expand new Vercel site to 10-page architecture

Implement the Sitemap Recommendations. Use Vercel file-based routing or Astro/Next.js static export. Preserve the cinematic homepage; build out service, industry, pricing, resource, and case study pages. Internal linking: services up to /, industries to services + /, resources cross-linked.

EXPECTED IMPACT: unlocks 8 keyword targets and 10 ranking surfaces. Single biggest move in the plan.

P1

Add Organization + LocalBusiness + FAQPage JSON-LD schema

JSON-LD block in <head> on /, /pricing, and every service page. Validate via search.google.com/test/rich-results before deploy. FAQPage uses the 8 Question Bank entries as the seed set.

EXPECTED IMPACT: +15-25% AE0 citation rate on pricing/services queries. Eligible for AI Overview.

P1

Update title tag + meta description on /

Replace current "WebFluence Digital — ROI-Driven Web Design & SEO for Irish & UK SMEs" with "Web Design Dublin | Live in 7 Days | WebFluence Digital" (55 chars, keyword-led). Meta description leads with "Custom websites for Dublin SMEs. Live in 7 days. Conversion-first design with SEO baked in. Starter from €997."

EXPECTED IMPACT: incremental CTR lift on existing impressions. Aligns title with primary commercial keyword.

P2

Build Wikidata + Crunchbase entity profiles

Wikidata: type Q4830453 (business), inception, founder (Dusan Walla), area-served, official website, sameAs links. Crunchbase: organisation profile with founders, category, founding location.

EXPECTED IMPACT: stronger entity disambiguation in Claude + Perplexity. Pre-requisite for sustained AI citation.

P2

Plan legacy webfluence.digital migration to SSG

Current Vite React SPA renders client-side. Migrate to Next.js static export or Astro before sunsetting in favour of new Vercel site. Preserve URL structure during cutover. Submit updated sitemap to GSC.

EXPECTED IMPACT: protects existing impressions during the migration. Avoids ranking loss on cutover.

P2

Run baseline AI citation audit (4 platforms × 30 prompts)

Query ChatGPT, Claude, Gemini, Perplexity with the Question Bank prompt set. Record citation rate per platform, identify which competitors win. Update Visibility Plan with baseline scorecard.

EXPECTED IMPACT: data foundation for AEO progress measurement. Required before P1/P2/P3 fixes can be evaluated.

P3

Original case study content for AI training corpus

Publish the Adare Clinic and Shelbourne Dental case studies with original screenshots, quoted client testimonials, and ranking/traffic deltas. Goal: become the authoritative reference for "best dental web designer ireland" in Perplexity.

EXPECTED IMPACT: long-tail AEO citations on industry-specific best-of queries.

07 — 90-DAY CONTENT PLAN

12 posts to ship.

Mix of pillar/cluster long-form (60%) and AEO-friendly question posts (40%). Each one targets a real keyword AND a real question. Distribution: LinkedIn always, plus Reddit/Newsletter/Twitter as fits.

Next review: 2026-05-09. We re-run the AI citation audit, ranking tracker, and technical audit against this plan to measure movement and generate the next fix pack.

NEXT STEPS

Page 1, or we keep working.

This audit is the start of the engagement, not the end. The retainer cadence is monthly: audit the deltas, ship the fixes, measure the citations, repeat. Page 1 isn't a one-shot — it's a compounding system.
